

We are delighted to announce our **EMIS NUG Virtual Conference**, the first online after 26 years of successful 'live' events.

September 24th 09:00am - 5:15pm (followed by EMISNUG AGM)

The App.is live now for registration and any advance questions:

<https://webapp.spotme.com/welcome/thefuturepracticetoday>

This year's event is **FREE! for everyone** – members and non members of the NUG.

We have applied for CPD for the day.

There is a large Exhibition Area for you to visit through the day and have Ardens as our Headline sponsor and Primary Care Pathways, Medlink and iGPR , Gold sponsors. EMIS will have a large presence for products, support and training.

We shall be using a conference app. accessible through your browser on any device - no downloads needed. Join for the whole day or dip in and out as your work allows. You will be able to interact with all exhibitors 1:1 or join small groups and join breakouts for discussion, support and demos. You can navigate the sessions and the day as you want and catch up later on anything you missed as the app. will remain live for delegates for 6 months.

The NHS Long Term Plan has been compressed into a few scary weeks. The rapid changes in practice show just how progressive and resilient is UK General Practice and virtualisation of our work has been a revolution. Our conference will highlight and share the best of the new ways of working to see us all through the next phase of NHS history - which, inevitably, will continue to involve Covid-19. Meanwhile structural changes dictate the need to reshape our services within the developing PCNs, STPs, ICSs and the rest. Networking and collaboration is the name of the game, **I.T. is the glue, so how best to make it all stick?**

Overall shape of the day:

- **2 streams:** an exciting programme of sessions with live Q&A – or send questions in advance.
- **EMIS news and update**, 4 main stream **EMIS sessions** plus comprehensive exhibition area with lots of trainers and reps. to answer your questions 1:1 or join small breakout groups to see demos, training tips, contribute to the user experience in development.
- Popular '**Challenge the Geeks**' session – pose your knotty problems to our geeks or add your brilliant tips
- Social **networking** with delegates via the App.
- Breaks between sessions to get **updates from our sponsors** and 1 hr lunch break to allow exhibitor areas to be visited (though you can 'walk through' and **visit exhibitors** at any time through the day, send questions or download material)
- The App will be kept live for up to 6m for delegates to visit all the content and for members the sessions will be uploaded to our website.
- Polls
- **Conference Challenge** – see who manages to do the most on the day and win prizes!
- **Charity raffle** for Alzheimers UK – even more wonderful prizes!!

PROGRAMME INCLUDES:

EMIS will have a large presence through the day with four main programme sessions, trainers and reps. for product demos, support questions, tips, downloads, interactive sessions etc
